This is a three piece part, so it's easier to print.

In addition to the printed parts, you will need:

2x M3 12mm screws

2x M3 nuts

I printed my brackets in Cura at 15% infill, with supports, and left the top and bottom layer off so I could see the infill pattern on the finished product.

Haven't tried this on the new Series X/S controllers, but I'm assuming they have a similar shape to the Xbox One controllers.
