### Summary

Compact, slide on ergonomic grip and cover for the Anbernic RG35XX H

[Gadgets](#) > [Video Games](#)

Tags: [case](#) [grip](#) [cover](#) [anbernic](#) [35xxh](#) [rg35xxh](#)

I liked the feel of @dildesigns [ergonomic grip](#) and the sleekness of @m00nd0gg [slide on design](#), so I hacked them together to create this slide on ergonomic case for the Anbernic RG35XXH.

I printed in PETG, 15% gyroid infill, and supports for the curved sides but it might've been okay without it. I also did some light sanding to smooth out the edges and sharp corners.

Sliding the case on and off may feel a bit tight at first (use the tips of your thumbs to push up through the speaker cutouts) but eases up after a bit. The case is held on by friction so you don't want it to be loose.

Enjoy and happy gaming!
