Tags: [prusa](#) [camera](#) [cameramount](#) [prusaxl](#) [prusaxlcamera](#)

A mount for the Logitech C270 camera on the Prusa XL. I already had the "EnXLosure" and "Top Rail Solid mount with Calibration Pin Holder" in use, so I decided to use the unused hole on the opposite side from where i store the calibration pin to mount the camera. Gives good view of the bed, tool heads, and doesn't interfere with the tool changer or the EnXLosure.

Needs <https://www.printables.com/model/664490-enxlosure-top-rail-solid-mount-with-calibration-pi/> to insert into.
