This is a simple model of a traffic cone with a hoop on the top for hanging as an ornament. It measures 50mm x 50mm and 63.5mm tall. Printing in TPU yields a flexible and very durable ornament.

Printed in TPU without supports at .32mm layer height with a .6mm nozzle in less than an hour. The clarity of the year (embedded on the bottom of the base) will be affected nozzle height.

A little background about the 2019 Portland traffic cone meme that started with someone leaving angry notes on a parked car: <https://imgur.com/gallery/InJGbQx>.

With love, from Portland, Oregon.
