The Dart Zone Thunderbolt is a flywheel foam dart blaster that shoots about 100fps stock and is perfect for use with HvZ game play. This carry handle is part of a set of accessories I am designing to optimize the blaster specifically for HvZ. It has integrated iron sights, which correct the bad aim of the stock iron sights. There is about 200mm of picatinny rail on top, for mounting lights, little rockets or pico boopers.

Two versions of this handle are included: With sling point and without. Sling point is currently on the left side of the handle for right-handed sling carry. Mirror the part horizontally before slicing to make it left-handed.

Hardware Required:

- Qty 2 of M3x30 Socket Cap Screws
- Qty 2 of M3 Hex Nuts

Stay tuned for other Thunderbolt HvZ accessories:

- Stringer based master-key for MEGA and MEGA XL
- Extended Battery Tray Cover
- Picatinny Side Rails
- Muzzle Shroud
- Double Magazine connectors
