Hello, this is a ball that I created, just wanted to make a bouncy ball out of ninja flex.

Filament: Ninja flex or other flexible filaments.

Infill: You can do 100% for a bouncy ball, or anything you want.

Infill type: Any type that can flex under pressure (Ex. Honeycomb).

Support: None needed :)

Size: Scale it to 1800%.

Model files

ninja-flex-bouncy-ball.stl

☐ Scale to 1800% for a 5 cm in diameter ball.
