Elegant and reusable gift boxes. Simply pick the correct size to print. The models are placed in folders by height. In each folder you will find an assortment of sizes.

Print setting: This model can be printed with 0.4mm, 0.5mm or 0.6mm nozzle size at any layer height. On the picture, the model is printed with a 0.4mm nozzle size at 0.20mm layer height. Multicoloured (MMU) printer is not required. The model is already in the optimal orientation for printing. Easy assembly, no glue required.

I suggest contrasting colour for the ribbons. The ribbons are also acting as a retainer for the cover.

Comment from a user (@DavidGadling_496242) :

1. Mix and match colors! Bottom, top, short bow, long bow - they can all be different!
2. If a box is very close to the size you need, you can scale them a little and everything will still work pretty well.
3. If you have fancy build plates or shiny filament, this is the time to use them.
4. Since I was doing this for Christmas gifts I specifically didn't make them Christmas themed. That way the recipients could re-use them

If you are looking for a GIFT CARD box, use this model instead : <https://www.printables.com/model/1084651-gift-card-gift-box>

Please leave comments, makes and suggestions, I do actively maintain this model.

This model is free. If you wish to tip me, you can do so at this link: <https://www.printables.com/model/773888-infinity-calander>
