I used coin artwork from the Pokemon card game to make these 5 Pokemon-themed coasters, featuring Charizard, Lucario, Psyduck, Ditto, and Metagross. Each coaster is 4in (101.6mm) in diameter and 4mm thick, requiring no supports to print.

These coasters can be printed in two colors for a unique accented color effect using the included .3mf file for Bambu Studio. Even if you don't have

a printer that supports multiple colors, you can simply switch out the filament at 3mm to transition the colors correctly (reference [this guide](#) for instructions on color swaps in Cura).

You can also find my other Pokemon coaster designs (seen below) at [this link](#).

I have a few coaster holder designs that were specifically made for these Pokemon coasters, found at [this link](#).

All credit for the original designs goes to the fantastic artists behind the Pokemon TCG. These models may not be used for any commercial purposes.
