updated 25. 7. 2024 | published 25. 7. 2024

Summary

Branches from Subcompact pistol to fidget keychains.

[Gadgets](#) > [Other Gadgets](#)

You'd be better off spending 30 minutes printing **Fidget butterfly knife keychain** to evaluate whether your fingers are too numb to make this fidget pistol.

Initial release STL - July 15, 2024.

Recheck the latest STL before starting printing.

Branches from [Subcompact pistol](#) to fidget keychains.

Basically downsized by 50% in slicer with some stl were updated specifically to do the job.

Keep your hands busy with this adorable pistol all day long.

Download SubCompactSimpleKeyChainGenericV1.3mf.

Layer height 0.1mm, 2walls, (1wall for slide lock spring).

You may study my print profile in [makerworld](#)

For raw stl, go to [Subcompact pistol](#) (except keychain specific parts**). All need scale down to 50%.

keychain specific parts**

1-Barrel tube (SubcompactSimple_BarrelTubeV5_keychain_icz.stl)

2-Barrel lock adapter (SubcompactSimple_BarrelLockV5_keychain_icz)

3-SubcompactSimple_SlideLockSpringStrongv2_icz.stl

4-SubCompactSimple_BodyKeychain_4709.stl

5-Optional threaded barrel for suppressor
(SubcompactSimple_BarrelTubeThreadedV5_KeyChain_icz.stl)

Demo & Build instruction [link](#)

Slide cut is makable too. Thanks @disinterest did it.
