Summary

Case for a Trezor One modified for USB C

[Gadgets](#) > [Other Gadgets](#)

For use with my modified Trezor One board with USB-C

https://github.com/Gigahawk/trezor-hw/releases/tag/v1.1_USB_C_v3

The -solidworks files are an alternate design of the outer case that will require supports for the USB C hole, but will probably look better than the main design unless you print with a resin printer or something.
