Summary

XXL Speed funnel for high waterflow needs

[Household](#) > [Outdoor & Garden](#)

Tags: [bottle](#) [water](#) [plant](#) [garden](#) [funnel](#)

XXL Funnel for high volume waterflow. Print this with around 0.2mm layer height or less so the spiral isnt too jagged.

There are two versions:

Version 1:

Funnel with extra large exithole for very fast flow with the following measurments

The top has a diameter of 200mm

The bottom hole has an inside diameter of 26mm and outside diameter of 30mm

Version 2:

Funnel with a sized hole to perfectly fit a European PET bottle with the following measurements:

The top has a diameter of 200mm

The bottom hole an inside diameter of 18mm and outside diameter of 21

FIX LOG:

fixed bottom spiral sticking out, preventing flat printing.

Added flat ring around nozzle so it sits straight on a bottle and doesnt move around.
