I created this case for my Wild deodorant refills. It's compact, uses less material than V1, has a tight closing lid and fits 2 refills. It mirrors the design of Wild's new deodorant cases which have rounded corners.

Printed this using a 1mm nozzle and Creality's transparent PETG. I also added some rubber feet for some extra stability.

Really happy with the result. Leave a like if you found this useful, and post your makes! I'd love to see them!
