Summary

Custom bracket to mount the front I/O + power module to the tubes of the Streacom DA6.

Tags: [pc](#) [mountingbracket](#) [streacom](#)

Due to the dense setup in the Streacom DA6 all the regular spots to mount the front I/O + power button module were blocked so I had to come up with an alternative solution.

This bracket/mount fits around the case tubes and mounts with zip ties.
