### Summary

A modified design enables you to hang your kitchen towel over wider cabinets.

[spacesaving](#) [kitchentowel](#) [kitchentowelholder](#) [kitchencabinet](#)

Not wanting to place the towel on the counter and not having the accessibility to hang it on the stove. I remixed a version of a kitchen towel holder I liked to accomodate my needs. This design was altered to accomodate wider cabinets, that being roughly 20mm in width.

Print Settings:

1. Infill: 20%
2. Layer Height: 0.2mm
3. Walls: At least 3 (you can do more if desired)
4. Material: PLA (you can use other materials as deired)

Assembly is very simple. Just screw in an M3 screw on each end. They can be either 25mm or 30mm screws.
