I wanted to have some fancy way to make switches with logos and stuff on them that I could expand or contract to include any number of switches that I wanted, with not too many, and not too few for any respective job.

This is a good effort only for the time I had (about 30 minutes), so make of that what you will :)

I guess I'm saying it could me much better if I had more time on my hands. Feel free to take this and do whatever you want with the files! It would be nice to get some attribution if you remix!
