I saw some ingenious makita charger peg board mounts out there. They involved magnets and all that. I wanted to make one just as cool, I promise you that. However, I wanted one everyone could enjoy. Just 3d print this, glue it to the bottom of your spare makita charger, and voila! Makita charger on your peg board. I could revise this to include magnets. But this is one piece to 3d print.

Note:

A few zip ties around the whole thing holds it on the plate very well
