Hook for hanging clay pigeons for target practice.

It has a 30mm diameter hole for hanging on up to a 1" or 25mm pipe, conduit, tube, etc.

Only uses approx. .6 meters of filament at a cost or \$0.04/each (give or take at today's filament prices)

Fits White brand clay pigeons. I don't know if they are all standard sizes. If not, I can update to fit other brands. Let me know if you need something modified. This works well for the ones I use.
