### Summary

looser tolerances with a bit of a taper on the pin should make the halves fit together better.

---

[Toys & Games](#) > [Other Toys & Games](#)

---

I could not fit the two halves together from turnipninja's improved frame (which I liked a lot) so I made another frame that is modeled after it. While I remodeled the whole thing, it is copied from turnipninja's design so I count it as a remix.

As the original, print two of them and stick them together.

Standard print settings are fine.

Edit: After having it a bit, the sides tend to open sometimes. A drop of superglue does the trick.
