### Summary

This Case is to prevent your Tapo Webcam from Dust and Water

[Household](#) > [Outdoor & Garden](#)

Tags: [case](#) [webcam](#) [outdoor](#) [indoor](#) [tapo](#)

This Case is to safe your Tapo C100 Indoor Webcam from Dust and Rain.

The picture is from another Reddit user, because i forgot to take a picture of my model when i uploaded it. I already asked him if i could get the Stl but he didnt answered me

Just print it and glue the squared part over the hole. But do it so, that you can see something throught your Webcam and the seight is okay.

Model of the Person who had the idea:

<https://www.printables.com/de/model/234146-megcam-a-tapo-c100c110-wildlife-camera-enclosure>

I dont guarantee that this case will prevent you from Water Damage or some differnt damages. I tried it for 4 Months an the cam is still working. If you want to be sure, that the cam survives, just put some Epoxy on the top.
