Tags: [storage](#) [bicycle](#) [moto](#) [gps](#) [motorcycle](#) [beeline](#)

Small and neat storage case for the Beeline Moto II GPS.

The pictures show the version with 0.16mm layerheight, 5 walls and 50% infill for maximum strength (and because i like the heavy and robust feeling of it).

The Thread is a bit tight at first, but it gets smoother the more often you use it.

If you download the stl file, you have to use the "split it in objects" feature in bambuslicer.
