Who doesn't like yellow forklifts? Everyone loves yellow forklifts!

Simple model to print and make.

Working steering and fork lifting system.

To assemble it you only need a little glue and some wire for the fork system hidden in the rear cylinder.

Being a large-scale model, it is full of details such as the water bottle or the Arbre Magique.

All pieces are printed in PLA in 0.10mm layer.

All pieces are optimized to be printed with few supports.

Happy lifting, I mean printing
