### Summary

Mount for the "Honeycomb Storage Wall" using the tesa Powerstrips LARGE double-sided tape.

Tags: [mount](#) [tape](#) [tesapowerstrips](#) [honeycombstoragewall](#)

I wanted a no-drill mounting solution for the Honeycomb Storage Wall. I found a good design and remixed it for my purposes. It is now sized perfectly for the tesa Powerstrips LARGE. Additionally, I made several other changes: the base is significantly thinner, the pegs are taller and slightly thicker for better grip.

You will need the insert-hollow-dual.stl part for the Honeycomb Storage Wall ([Honeycomb storage wall > Fasteners and parts for attaching hooks and objects > insert-hollow-dual.stl](#)). This also allows you to connect two walls together.

I recommend printing with 0.2mm layers and setting the bottom shell layers to 6.
