updated 13. 7. 2024 | published 13. 7. 2024

## Summary

This light ribbon cable supports your print head cable and PTFE tube.

[3D Printers](#) > [Bambu Lab Parts & Upgrades](#)

First little disclaimer. This part is not polished, additional revisions are likely. Please provide feedback. =)

The idea behind the ribbon version is a lighter part (less than 14g) and potentially less harmonic distortion transferring to the printed parts. This ribbon section is designed to be a drop-in replacement for an existing ribbon cable on your Bambu. If you do not have an existing cable chain, you will need the additional 2 parts for installation.
