### Summary

Holds remote for LED lights in a bedroom

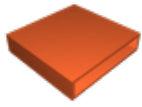

[Gadgets](#) > [Other Gadgets](#)

Tags: [holder](#) [attach](#)

My daughter said she misplaces her remote for her LED lights in her bedroom and asked for me to make a holder. I used my calipers to measure her fingers when she gave me dimensions of the remote. Figured only a portion of it would need to be stored inside, and some double sided tape would make for a decent mount in her bedroom and not leave marks or nail/screw holes. Printed in PLA standing up so no supports needed. Enjoy!

62x64x14mm box with 60x60x10mm hole inside, leaving 2mm wall thickness.
