### Summary

Riser for Michal Fanta's W6 and W7 Viaduct Pillar to make them 75mm

[Toys & Games](#) > [Building Toys](#)

Tags: [railway](#) [train](#) [woodentrain](#) [riser](#) [wooden](#)  
[woodentrack](#) [viaduct](#)

This is a remix for my previous model in case you have a use case to need just one of the narrow W6 or W7 pillar pieces from [Michal Fanta's Train Track Pieces](#). The original model is good for when two are paired together, but can't always predict how my son will like to build our train tracks.

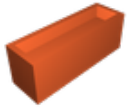

### This remix is based on
