Summary

A batteries case to hang on the keyring so you won't forget the batteries :)

[batterycase](#) [hearingaid](#) [hearing](#)

After a while with hearing aid I keep forgetting the batteries at home so I made a case for them to hang on my keys.

This is currently for the 312 batteries but maybe I'll upload more in the near future :)

Just snap the two parts together.

Print Setting:

PLA HP

Nozzle 210

Bed 60

Layer Height 0.12 or lower

Printed in PLA but I think it's better to print with PETG
