### Summary

Illuminates the print - provides shadow for inspection of the print layers

[3D Printers](#) > [Creality Parts & Upgrades](#)

Tags: [lamp](#) [led](#) [ender3v3se](#)

Designed to attach the the bed structure and provide light, low down so as to highlight or rather create shadows while printing those pesky initial layers.

It was designed to clear the tool head at all points of the print envelope. It also has a degree of flex in it so switching on or off the lamp doesnt interfere with the bed movement.

Uses one Kapplake LED unit from IKEA
