Summary

Use this extension to pull ceiling fan chains that you normally can't reach

[Household](#) > [Living Room](#)

There are three ceiling fans with chains I can't reach in my house so I created this tool. The design consists of a chain pull head and a handle butt end. They both fit inside 1/2" D2241 PVC pipe (ID approximately 0.71", wall thickness approximately 0.065") which you will need to cut to length. Alternatively, you could print sections of tubing and glue them together. I chose to glue the butt end in the PVC and to use 2 screws for the pull head.

Note that in a pinch, this makes a pretty good back scratch tool.
