Summary

Side mount Tool carrier for quick access to commonly used tools

[Household](#) > [Garage](#)

Tags: [tool](#) [holder](#) [mounted](#) [kobalt](#) [casestack](#)

This is a tool holster I made with my specific use case in mind. The top rail has two larger slots meant for my 1/4" 90 adapter and my bit driver handle, then two small slots for smaller screwdrivers. Then a slot made to hold pliers or side cutters and a Zip-Tie holster.

The bottom rail is made to have 8 1/4 " slots with 5 being passthrough slots to accommodate quick change adapters, and the final slot was made for a small ratchet .

I intend to make some changes to this model as the zip-tie holster is problematic with the openings and the ratchet holster is going to be changed to a slotted mount.

Pictured model was printed in Creality Blue PETG
