DescriptionTree supports is needed for the pin holes in the piston

This stylish and functional headphone stand is designed to mimic the look of a piston and connecting rod, adding a unique and industrial touch to any workspace or gaming setup. The base, resembling a piston, provides a stable foundation for the stand, while the connecting rod with a circular holder at the top securely cradles your headphones when not in use.

The detailed grooves on the piston base enhance its realistic appearance, making it a perfect accessory for car enthusiasts or anyone who appreciates mechanical design. Whether on your desk or shelf, this headphone stand ensures that your headphones are always within reach and displayed with style.
