## Summary

I made this model to test my adhesion of small surface areas. Extremely hard (for me at least) to get to work. .25n

I made this model to test my adhesion of small surface areas. Extremely hard (for me at least) to get to work. See how high you can go and share your settings.

I have completed it myself after a fiddling a bit. Maybe I'm a noob, show me up ;-)

Share results with finished model on the plate, no brims, no skirt.

Quality isn't important, just make it stick.
