Summary

This tiny plant pot fits inside a terrarium stump with a plant hole of about 32mm in diameter.

If you have a terrarium stump hideout such as the one in this [listing](#) then you might want to print this pot to house a tiny plant. This offers easy maintenance for the plant as you can pull it out to re-plant or water. The lip on the pot is added for an easy removal from the stump.

I recommend printing in vase mode with any layer height. I printed mine in PETG to withstand heat lamp in the terrarium.

I am including a Fusion file so you can modify it to fit your terrarium.

I'd love to see your makes!
