[festival](#) [kueche](#) [fete](#) [schnaps](#)

Small shot cup for on the go.

The cup and bottom can be printed without support.

Support is only required for the lid.

I also printed everything without brim, so it's easier to remove and you don't have to fiddle everything free again.

The quality should be 0.2 or better 0.16.

I used PLA.

The cup is separate and is later placed or glued onto the bottom area.

You have the choice.

Anyone who would like to support me is very welcome to buy me a coffee
