updated 14. 7. 2024 | published 14. 7. 2024

### Summary

The Gotcha Ranger will snap down into this and be held snugly in place. Remix with your desired attachment mechanism.

---

[Gadgets](#) > [Other Gadgets](#)

---

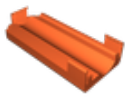

I wanted to make a holder for my Gotcha Ranger so that I could attach it to my bike. This is the result.

I backtracked it to before I added the actual attachment piece, as the place I attached it was very non-standard.

Remix this with your desired way of attaching it to whatever you need.

Recommend printing with supports, long-ways-up with the big tab at the top.
