Summary

This remix of TheDOJ's filament system is made for MK4. The original legs had spiky tips that would collide with the MK4

[3D Printers](#) > [Prusa Parts & Upgrades](#)

Tags: [filamentdryer](#) [sovol3d](#)

This is a remix of TheDoJ's filament mount system found here <https://www.printables.com/model/377542-mk3s-filament-dryer>

The original leg mounts had spikes jutting out that would collide with the MK4 extruder. So I took the original leg designs and cut them in prusa slicer to remove the spiky parts.

Download the base of the table from his file. Download these legs and enjoy the shelf.

Notes For New Users:

- Recommend printing in PETG so the parts can flex a bit to snap on
- I recommend a filament guide as well. I used this <https://www.printables.com/model/1299-filament-guide>

This remix is based on

MK3S Filament Dryer Shelf System - Sovol 3D
