Summary

A basic blank panel section for a Square D Homeline electrical panel.

[Household](#) > [Other House Equipment](#)

Tags: [blank](#) [panel](#) [squared](#) [circuitbreaker](#) [homeline](#)

I needed a panel blank but the only Homeline one I could find was not so great. There was one for the QO panels but they are wider.

There are built-in supports, and I chamfered the bottom to eliminate elephant's foot.

0.20 mm layer height is ideal, Infill doesn't matter...it's a fast print, I stuck with standard Voron settings.
