Summary

The fastest and lighter ever!

This is not my first shoe organizer, but I wanted to create one that is much faster and much lighter!

In just **3 hours** and with only **130gr**, you will have an organizer ready to be used!

And the nice thing is that you can customize it as you like!

There are already 3 patterns in the file, but just change the type of filling in the modifiers, and you're done!

HOW DOES IT WORKS???

-- PRINTING PROBLEMS --

I know how frustrating it can be to have problems during a print, and I'm happy to receive constructive criticism or suggestions about the model, but please always calibrate the flow and if you have adhesion problems, try using the brim or a gripper. All these fails are not due to the model. All my files are tested before being published and the print profile with which I succeed is the one I publish.

Thank you very much for your understanding and happy printing to everyone!
