This phone tripod mount is compatible with phones ranging in width from 68mm to 115mm. It has been tested with an iPhone 12 and an iPhone 14 pro max. A few rubber bands are needed to properly attach the smartphone, which you can easily attach to the two hooks on the back. At the bottom of the mount there is a 1/4-20 printed thread to attach the mount to a tripod, therefore no special hardware is needed to use this mount.
