Hey there!

I made this keychain inspired by the Jaguar logo design for your car key, regular key, backback or anything else! There is Jaguar logo on one side and the other side is blank. The diameter of the original model is 5cm or 1.97 inches which should be just right in most cases, however feel free to scale it up or down if you want to :)

Please notice that I'm not an owner of a 3D printer, so the model itself and the printing settings haven't been tested before. However, I hope that my work could help anyone and someone. I would really appreciate any sort of feedback in order to improve my future projects.

Thank you for checking out my model and I really hope it meets your expectations!
