This is a attachment for the Aeropress. it screws on the like the cap and provides storage. Print part A, B and C. Add some glue to permanently connect them.

I recommend to print the Container 1a and 1b for storing the paper filters. The Container 2 fits inside the Aeropress cap. Utilizing the spare space.

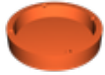

Alternatively Container 3 fills the whole cavity, but can't store filters.

Based on the "AeroPress extension" Design by [@David_35961](#)
