From the first time I used it, I was annoyed by the fact that the knife bends slightly at the end when sharpening while using the original Hol magnetic angle support. The horl knife sharpener is so well thought out in many ways but somehow there is still no solution to this problem.

this model is my first attempt to master this. and it is also an organizer for all the accessories I have in my household.

unfortunately, i find the original wooden organizer completely overpriced and also functionless.

In my opinion, the Horl knife sharpener is by far the best product for domestic use to sharpen knives properly with little effort.

I have created this model because I like this product so much.

To complete the model you need the following parts:

Magnets

<https://amzn.eu/d/03x7afWr>

Rubber Feet

<https://amzn.eu/d/0iKNljMQ>

This is a work in progress project. Please give me feedback and i will gladly adapt the model to your wishes.
