Hello, I've been looking for a suitable and compact toothbrush holder for a long time, but I couldn't find it, so I created it, I hope you like it.

I recommend mounting to the wall with a double-sided tape or a screw with a model intended for this.

Zdravím vás , dlho som hľadal vhodný a kompaktný držiak zubnej kefky, keďže som ho nenašiel , tak som ho vytvoril, snád' sa vám bude páčiť.

Montáž k stene doporučujem obojstrannou páskou, alebo skrutkou s na to určeným modelom.

### Print Settings

- 0.2 mm layer height ,line width of 0.4mm

- **3 perimeters**
- **20% cubic infill**
- **4 Top and 4 Bottom layers**
- **support is needed**

## Filaments

- **PETG**
- **PLA**
