My car came with a couple of seatbelt covers missing, it has come to the point that it bothers me enough to design a replacement part for it.

The VIN OEM number of the original part is 1J0857719.

As with everything in your car, don't print this in PLA, as in summer it gets too hot for PLA to survive. I personally recommend PETG, but use what ever filament type you desire.

This part can be printed without support, VW logo face down on the print bed. (make sure your bridging is spot on, if not it might not click in place properly).

Print Settings

Printer:

Anycubic Kossel XL

Rafts:

No

Supports:

No

Resolution:

0.1618

Infill:

15%

Category: Automotive
