This model is for a refrigerator magnet intended to be printed in 2 colors. I've included 2 models; one for an 8mm diameter round magnet and the other for a 10mm diameter round magnet. You can scale the design (X & Y) in the slicer for other diameters. If your magnet is thicker than 3mm you can scale the Z axis in your slicer to accommodate. Leave me a comment if you would like me to submit designs for other sizes. I printed using PLA however other filaments will work just as well. None of the print parameters are critical. I printed on a textured plate because I felt it gave a better finished look. The magnet is a tight press fit so glue shouldn't be required.
