I made this based on my 2010 Toyota Avalon. It is like similar or the same for 2007 to 2010, possibly also 2011 and 2012. I believe it is also similar or the same for a Camry of similar year range.

Disclaimer: The original part is some type of rubber. I have not 3D printed this for my car and provide it for educational or reference use only. I don't recommend or endorse using this to make this part for your vehicle.
