NOTICE V2 is coming very soon (changes to risers C & D)

This **ONLY** works with the FlashForge 5M Enclosure mod.

All credit goes to Ilyas for his superb creative & design work on his original enclosure mod.

I have remixed some files from the Ilyas Mod Enclosure files to work with the existing official FlashForge 5m enclosure mod which can be found here: https://wiki.flashforge.com/en/knowledge_corner/printer-mod-and-diy

I have tweaked some files to suit my own needs...All is explained in the README file.

This mod uses the official FlashForge enclosure files: guard plates, door hinges and handle, top cover handle & x6 magnet holders.

More information can be found on the Flashforge Official User Group on Facebook where i've been posting my WIP on this.

I've included a README folder in the zip file with a Readme PDF, Installation PDF and further images to help you understand the files and components involved in printing and installing this mod.

This is a work in progress and may be updated in the near future.

This remix is based on

ILYAS mod. for AD5m

by IL'YAS

Model files
