Summary

Aggressive looking warning sign

[Art & Design](#) > [Other Art & Designs](#)

Tags: [decoration](#) [sign](#) [plate](#) [decor](#) [art](#) [warning](#) [wallart](#)

140mm x 140mm x 4mm.

Slicers that can work with 2 filaments or more, like Orca and Creality Print, should automatically insert a filament change into the gcode, at the correct layer height, when you have a single filament printer. Then you use the .3mf file.

1 filament slicers like Cura, you have to manually insert a “pause at layer height”, at the correct Height, depending on the layer height you use. Cura can only use the .stl file.
