Tags: [fidget](#) [fidgettoy](#) [fidgetbutton](#) [springfidget](#)

Spring fidget button.

2 files provided (stl):

- Spring fidget button and body.
- Spring fidget button spring. See notes description for some tips for printing.

Model Name: Spring Fidget Button.

Material: PLA.

Layer height: 0.16mm

Infill (**important**):

- 65% infill for the spring (using a matt PLA, such as Matt Grey works better for the spring longevity, opposed to glossy PLA's).
- 15% infill for all other parts.

Supports: For the spring only, use tree supports.

Post printing: Sand any seams off the button base edge to ensure a smoother operation.

Assembly: see pictures of the exploded diagram.

Hope you enjoy and happy printing :)
