## Summary

The moving jaws and stopping button were a single file, so I split them to print them in different colors and similar.

Tags: [parts](#) [caliper](#) [vernier](#)

I wanted to print the moving jaws and the lil button in different colors so I separated them into two different files.

I also wanted to use the caliper as a keychain so I made a button with a hole in it, technically the chain itself prevented the jaws from falling but the button looks nice
