### Summary

When buying a Pen Camera, usually they don't have the cover for the body - So here is the solution!

[Gadgets](#) > [Photo & Video](#)

Tags: [camera](#) [pen](#) [olympus](#) [film](#) [35mm](#) [filmphotography](#)

I designed the cap for when the camera is stored without a lens.

The model is a multicolor design. It also can be printed without the letter by leaving the place empty (you just have to delete the three parts of the letter in the 3mf file).

I recommend printing it with PLA. The settings are already configured in the 3mf file, also the supports.

P.D: Yes, I know the gothic letter is mirrored. In the model, it's fixed.
